

# FSSA Technology Services

## Software Update Release Notes

FSSA Technology Services has released a software update to the following product.

Product: CORM

Date: November 19, 2008

The following changes occurred to this product as a result of the update. For more information about these changes, refer to the attached user guide.

### **Replace Fiscal Tab with Group Tab**

This update removes the Fiscal tab from the DART tabs area and adds the Group tab. The group tab contains service coordination information.

### **Lengthen Setting Field in Demographic Area**

This update increases the length of the SETTING field in the demographics area that appears when you view an open episode. You can also deposit your cursor in the field and use the Left or Right Arrow key to move within the field.

### **Prevent a User from Uploading an Open File**

This update prevents a user from uploading an open file. If a user attempts to upload an open file, a message similar to the following example appears:

"Trying to upload the document failed

The process cannot access the file [file name] because it is being used by another process."

### **Prevent a User from Entering a Duplicate Consumer**

This update prevents a user from entering a duplicate consumer. When a user adds or edits a consumer and enters a social security number that already exists, a red exclamation mark appears beside the SSN field and the system displays a message similar to the following example:

"Invalid Input

There are still errors on this form."

### **(OUTREACH ONLY) Added REFERRAL CANCELLED to the Admin Support Service Descriptions**

This update adds Referral Cancelled to the Select a Service Description window for the Admin Support service type in Outreach.

**(OUTREACH ONLY) Added UPDATE to the Admin Support Service Descriptions**

This update adds Update to the Select a Service Description window for the Admin Support service type in Outreach.
